  <p style="color:black;font-size:1.25em;">My School was founded in year 2018 in order to provide quality education a place where the student's needs are the center of the educational philosophy, where excellence is stressed by providing individual attention and the overall social development of the children is carefully nurtured.The school prepares children to appear for the CBSE Board examination. The highlights of our educational philosophy are: we insist on individual attention, is it a small class size, individual counseling in school premises. Instead of emphasizing rote learning, we encourage debate and promote interactive learning. The socialization of the child is very important to us, which is achieved through a self conceived house system, individual counseling,and healthy competition.The music and art rooms are well equipped for, and are continuously upgraded. A large multipurpose auditorium is available to host various cultural program and also substitutes as badminton and table tennis court. Sports form an important part of the daily routine in school and all children are required to take part. The school has play ground and all the required equipment.</p>
